Abstract

Objective: ...

Methods: ...

Results: ...

Conclusions: ...

Keywords: Stunting, Machine learning, LightGBM, SHAP, Peru, Triage

1. Introduction

Childhood stunting is a public health problem [1, 2].

*Corresponding author.
Email address: CORRESPONDING-AUTHOR-EMAIL (Verónica Lisseth Vergara Rojas)

2. Methods

2.1. Data understanding

2.2. Data preparation

2.3. Modeling

2.4. Evaluation

2.5. Deployment

2.6. Ethical considerations

3. Results

4. Discussion

5. Conclusions

Data availability

The ENDES microdata are publicly available from the INEI portal (`https://proyectos.inei.gob.pe/microdatos/`). The code and the trained model are deposited in Zenodo (code: `https://doi.org/10.5281/zenodo.23963410`; model: `https://doi.org/10.5281/zenodo.23962363`).

Funding

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

Declaration of competing interest

The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

Acknowledgments

Declaration of generative AI and AI-assisted technologies in the manuscript preparation process

During the preparation of this work the authors used Claude (Anthropic) to improve the writing, readability and organization of the text. After using this tool, the authors reviewed and edited the content as needed and take full responsibility for the content of the published article.
